

MUYIWA OBADARA

Data Scientist | Machine Learning Scientist

+234-(808)-194-3523 muiyiwa.j.obadara@gmail.com linkedin.com/in/obadara-m github.com/mobadara

SUMMARY

Innovative and Microsoft Certified Data Scientist (Azure DP-100) with a rigorous scientific background in Physics. Passionate about democratizing technology, currently leveraging Python, SQL, and Machine Learning to build scalable, inclusive AI solutions. Proven track record in technical mentorship and community building, bringing a unique perspective on accessible design and diversity to engineering challenges. Dedicated to continuous technical growth

SKILLS

Languages

Python, SQL, JavaScript

Machine Learning

PyTorch, TensorFlow, Scikit-learn, Predictive Modelling, NumPy, Pandas, Seaborn, MLOps, Statistics, Data Preprocessing, Exploratory Data Analysis, Data Visualization, Model Evaluation

Cloud & Tools

Azure Machine Learning, Git/GitHub, Docker, Jupyter Notebooks, Microsoft Fabric, MLFlow, Power BI

Soft Skills

Business Communication, Critical Thinking, Results Communication, Technical Mentorship, Time Management

EXPERIENCE

AI/ML Developers' Foundry Fellow

Tech4Dev

09/2025 - Present Lagos, Nigeria

- Selected as 1 of 100 fellows (from 1,495 applicants) for a competitive 12-month AI/ML fellowship.
- Improved domain solutions by applying deep learning in {5} real-world projects across diverse areas.
- Collaborating with peers and mentors via Microsoft Teams and SharePoint to build industry-ready AI solutions.

Lloyds Banking Group Data Science Job Simulation on Forage

Lloyds Bank

12/2025 Remote

- Completed a job simulation involving customer churn prediction for the Data Science & Analytics team at Lloyds Banking Group.
- Developed and implemented a predictive model using random forest and other machine learning algorithms, achieving an ROC-AUC score of 0.82.
- Conducted advanced data preprocessing, including handling missing values, encoding categorical variables, and feature scaling, utilising Python libraries such as pandas, scikit-learn, and Matplotlib.
- Performed comprehensive model evaluation and tuning, optimising hyperparameters with GridSearchCV, and applied feature importance analysis to derive actionable business insights.

Data Scientist Intern

Technocolabs Software Inc

04/2025 - 06/2025 Indore, India

- Built and optimised a regression-based ETA model to improve last-mile logistics delivery, achieved above 80% accuracy.
- Improved prediction accuracy by {15%} by engineering features from geolocation and timestamp data and tuning 2 regression models.
- Visualized model performance and residuals to support data-driven operational decisions.

Software Engineering Lecturer

Adecom College of Business & Management

10/2024 - 04/2025 Ibadan, Nigeria

- Increased student programming expertise by {75%} through teaching C++ to {35} HND I students and web development to {30} HND II students.
- Designed and delivered lectures, assignments, and assessments aligned with national higher education standards.
- Evaluated student performance through tests and examinations, fostering practical coding proficiency and problem-solving skills.

EXPERIENCE

Mathematics & Physics Teacher

Freelance - Various High Schools

📅 09/2019 - 10/2024 📍 Ibadan, Nigeria

- Taught Mathematics and Physics under both WAEC and Cambridge A-Level curricula across multiple schools.
- Designed and deployed a CBT and School Management System, reducing manual grading time and improving data accessibility for teachers and administrators.
- Integrated scientific computing and analytical thinking into lessons—skills that sparked my transition into data science.

CERTIFICATIONS

Azure Data Scientist Associate - DP-100

Microsoft

Professional Data Scientist Certification

Datacamp

Jobberman Soft-Skills Training

Jobberman

EDUCATION

Bachelor of Science in Physics

University of Ibadan

📅 02/2016 - 04/2019 📍 Ibadan, Nigeria

PROJECTS

TorchFlow

🔗 <https://github.com/mobadara/torchflow>

An open-source Python package for simplifying PyTorch model training and tuning.

- Built and published on PyPI (torchflow-core) to streamline deep learning workflows.
- Designed modular tools for training loops, callbacks, and experiment tracking.
- Developed documentation site and open-source contribution guide for community adoption.

Cardiovascular Disease Risk Prediction

🔗 <https://github.com/mobadara/cardiovascular-disease-risk-prediction>

Built a predictive machine learning model to estimate cardiovascular disease risk from clinical and lifestyle data, improving accessibility to preventive insights.

- Applied data preprocessing, feature engineering, and model training using Scikit-learn and Pandas.
- Improved risk prediction efficiency by deploying model on FastAPI RESTful service hosted on Render.
- Focused on model interpretability and responsible AI in healthcare decision support.

Proficient

KEY ACHIEVEMENTS

Published Torchflow,

An open-source PyTorch library on PyPI, enabling simplified model training and tuning for the AI/ML community.

Completed a full machine learning lifecycle

From data preparation to FastAPI deployment — in the Cardiovascular Disease Risk Prediction project, demonstrating end-to-end applied AI skills in healthcare.
